

## **Classic 3200 Odorless Paste Flux**

Classic 3200 Paste Flux is specially formulated for soldering lead, zinc, and lead-free came. When your came doesn't cut perfectly and the ends don't touch, this flux helps the solder bridge the gap. It is easy to use and even works on heavily oxidized came.

Classic 3200 Paste Flux cleans off quickly with minimal wiping and is non-corroding after washing. It is available in 2 oz. Containers.

Order Classic 3200 Paste Flux from your distributor of Stained Glass products!

*Fry Technology also offers a complete line of solders and lead or lead-free came for every stained glass application*
